Note Adobe's Adobe Bridge application can connect to both Lightroom and Photoshop files and import them. If you're using Lightroom, you have to have the Lightroom application installed on your Mac or PC, but you don't need to use Adobe Bridge. You can find a crash course on Photoshop on Adobe's Web site (www.adobe.com/products/photoshop.html). For example, to open a document in Photoshop, press the key to access the menu bar, choose the Edit→Open dialog box, and then navigate to your file. ## Software for Sharpening Pictures Image-editing programs such as Photoshop and Elements also have sharpening tools, but they're more complex. Adobe Photoshop Elements is the only free version of Photoshop that is allowed to use, modify or create images with over 25M assets, and the developers of the program gave us one of the best reasons to upgrade to Photoshop Elements 12. There have been two big features added to Elements 12: 1. Add-ons This adds a new layer to Elements 12 where you can save and find some of the Photoshop tools, like filters, adjustment layers, adjustment masks, and even Photoshop actions. While we don't cover add-ons in this post, we suggest checking out the official tutorial on how to find and use add-ons on the Adobe website. 2. Camera Raw This is one of the big things that changed in Adobe Photoshop. The other big change is that Photoshop has been rewritten from the ground up. All of the long requests from users are implemented in the new release, such as the ability to edit your raw photos and open them in another version of Photoshop. If you want to see the updates to Photoshop Elements 12, you can read them here and here. 1. Create high-quality videos You can now create videos in Elements using the same tools you're used to using in the video editor in Adobe Premiere Pro. Take a look at the process below: 2. Take images with the best background You can now set the background as a selection and use it in your projects. You can use this to lighten a subject from a dark background or to lighten a subject from a white background. You can get a better idea in the example below: 3. In the blind review process, authors do not see the reviewer comments until after their article is peer reviewed by the editor. This time lag results in less time available for authors to respond to concerns, making it even more important to respond quickly after the peer review to avoid a negative impact on publication of a manuscript.[^][@CR1][^] If authors do not respond, the editor must contact the corresponding author, who will then send a manuscript to the reviewer. It is important for authors to see and understand the reviewer comments as quickly as possible in order to formulate a timely response. There are several resources available for authors to obtain information about reviewer comments. These resources include the editorial workflow document (the manuscript preparation, editorial and peer-review workflow) and the reviewer comments spreadsheet that appears in the online peer-review database (the comments spreadsheet). Another option is the "Manuscript Details" view in the online peer-review database, which lists the reviewer's name, institution, role in the review, and comments. Over the last few years we have seen an increased number of manuscripts with multiple manuscript versions. Some journals impose a strict timeline for when authors should submit their revisions, yet very often the original reviewer comments have not been reviewed until revision is submitted. These concerns complicate the peer-review process and increase the likelihood of delayed or missed reviewer comments. As the National Institute of Allergy and Infectious Diseases (NIAID) funds research concerning the Zika virus, NIAID recently announced the availability of more funds to fund rapid responses to requests for Zika research as part of the Clinical and Translational Science Awards (CTSA) program.[^][@CR2][^] The CTSA program grants awards
