How to load a template Create the first run document by dragging templates that you wish to use when you open a file. To begin the first run, go to File > New > Run. When you open the New Run dialog, the Name field is automatically pre-filled with the most recently opened file's name. If you want to make changes to this file, click the drop down arrow next to the Name field, click Browse and navigate to the file. Click Open. Run the first run document. The Runs window opens automatically. If it does not, click Window, and then click Runs. To open the Runs window, go to File > New > Runs. You will see the name of the most recently opened file. If there are no more files open, you will see the following message: There are no files open. You need to open a file. If there are more than one file open, then the Runs window shows the name of the most recently opened file. To run the document with a different template, select a new template and click Open. [3:16 min] AutoCAD Professional 2D (Video) [2:58 min] AutoCAD Professional 3D (Video) Live Envelopes are a new "live" tool that allows you to review the change as it takes place. You can approve, reject, or make changes to your drawing by viewing the change in real time while it's being made. (video: 1:27 min.) In the past, the application or drawing had to be paused and exited in order to make a change. You'd have to exit and re-open the drawing in order to continue. Now, you can make edits while you work without having to pause. You can also instantly discard or keep changes, and undo each one. (video: 2:09 min.) [2:06 min] When a new drawing opens, AutoCAD instantly previews the most recent version in the associated drawing set. (video: 0:59 min.)
