Minimalist MEGA-vetted Chrome extension that should improve your user experience with the platform Right off the bat, we should point out that this is a very minimalist Chrome extension, without a proper UI and that does all its magic by running unobtrusively in the background. In just a few words, this extension is meant to strengthen the security while using MEGA and make your browser a bit more MEGA-aware, if you will. For example, any MEGA URL is automatically "captured" by the extension, and supposedly, it's also meant to improve the overall download performance, which, in turn, will reduce loading times. How much of an improvement can there actually be, however, we can't really say. Two ways of installing it To install it, simply visit its official Chrome Web Store page and click the "ADD TO CHROME" button. You will notice that it integrates with Chrome's toolbar, by making its presence in the typical place, next to all your other extensions, on the right side of the address bar. Alternatively, you can download the extension directly from its official website via the link provided in our download section, in which case, you subsequently need to manually install it by dragging and dropping the crx file into Chrome's extensions page. As mentioned before, you can't interact directly with the extension, so you might as well hide its icon altogether and save some space. All possible advantages, no real drawbacks worth considering Taking everything into account, there's absolutely no reason why you shouldn't install MEGA for Chrome Torrent Download if you're a MEGA user. As we're sure you'll agree, everything meant to improve security and performance is well worth having, and, since it's an official extension developed by the same company, there's really no reason to doubt that. The question might not be very popular, but it seems that Google was checking whether this was on the up-and-up. The company recently sent a special database query that could have revealed the MEGA password. MEGA Password Hidden? Google's database has been updated multiple times and includes various additional information about all Google users. This is one of the latest such updates to the system that includes details about the company's users of Google Play Music, YouTube, Chrome and other products. Interestingly, it looks like MEGA's own security rules do not specify that they should keep the password safe when an account owner is out of the country. Furthermore, other details, 09e8f5149f

Will be using this. Click Here to Leave a Comment Below 5 I just found this. I used MEGA for about 3 years before switching to Dropbox. It's a very good service, but I don't see MEGA improving as it's quite expensive compared to other free services out there (not including unlimited storage). Click Here to Leave a Comment Below 5 Interesting idea for an extension. I'm wondering if it will be applicable for Download Automatically and the download queue. I rarely download stuff from MEGA which means I would have to enable it every time. MEGA is a great service to have. It has the best file storage of any cloud service out there bar none. However the only problem is that it is not integrated into Chrome, and as such it does not work well with Chrome as it would with other browsers.
