What's New in the AutoCAD?

Markup Import allows you to send drawings or AutoCAD objects to a third-party application such as LaTeX, Adobe PageMaker, or Microsoft Word, which is used to format the drawing onscreen and then return it back to AutoCAD for incorporation into the current drawing session. (video: 2:20 min.) Markup Assist lets you see your drawing formatted in a third-party application. You can use this onscreen preview to find and correct errors in your drawing by referencing existing drawings. (video: 1:40 min.) Print Preview: Print Preview shows you what you'll see onscreen when your drawing is printed, providing a quick preview before you choose the best printer settings. This feature is especially useful if you're outputting drawings to paper or PDF for viewing purposes. (video: 1:30 min.) Projection tools: Quickly change your drawing's perspective and view. Now you can use most of the projection tools with even greater precision and control. (video: 1:40 min.) You can select an area of your drawing, then apply one of the projection tools: •Perspective Correction: Rotates, moves, or scales your view so that it's parallel to a three-dimensional model. (video: 1:30 min.) •View Transform: Rotates, moves, or scales your view to view a specific viewpoint. (video: 1:30 min.) •View Director: Rotates your view to rotate an object in your drawing. (video: 1:30 min.) •View Box: Controls a box around your view that's then automatically clipped to the drawing area. (video: 1:30 min.) •View Camera: Changes your view to see a specific viewpoint. (video: 1:30 min.) •Top and Bottom Viewpoint: Moves your view above or below a selected viewpoint. (video: 1:30 min.) •Zoom: Changes your view to zoom in or out. (video: 1:30 min.) In addition to all of the projection tools, you can also use the existing 3D orthographic (mirrored) view command and the perspective/zoom view box commands. (video: 1:30 min.) •View Entrance: Creates a 3D model to allow you
