What's New in the?

Cross Invoice is a complete software solution that can help you produce invoices online with ease and accuracy. It is a powerful tool that includes a wizard-based configuration menu and a simple user interface that packs various functions for convenient access by business owners and technicians. The configuration menu lets you edit settings related to the application's appearance, currency, invoice header text and company logo. In addition, you can access lists of offers, customers, products, and pay methods, while the application enables you to print invoices or offers directly from the application. All that on your computer screen. Cross Invoice Features: Simple user interface This program comes with a minimalistic, uncomplicated user interface that packs various functions, which are neatly organized so that you can operate them without spending time browsing endless menus. Although no local form of help configuration is provided to you, its controls are intuitive enough to be accessed with minimum difficulty, even by novices. Wizard configuration menu When you first launch Cross Invoice, you are prompted with a configuration wizard that helps you set up your application by tweaking its components so that they better fit your preferences. Among the adjustable options you can find settings related to the program's appearance, currency, invoice header text and company logo. Customizing these parameters should be accomplished with ease since the configuration menu is quite intuitive and does not feature complicated controls. Create invoices and keep track of your customers and merchandise This program can help you manage your company by enabling you to keep track of both your products and customers' details, while also letting you generate invoices or offers, depending on the situation. The main window lets you access lists of offers, invoices, products, customers, payment methods and signatures. Before

generating invoices or offers, you need to create a database of products and have customers' information included in your database, since you cannot fill in the required data on the go. Any entry that you add to your database can be deleted or edited according to your needs. Additionally, you can print them directly from the application by simply selecting them and hitting the Print button on the top toolbar. Lightweight invoice creator with product and customer database support All in all, Cross Invoice is a reliable tool that can help you generate invoices on your computer with ease, while also enabling you to keep track of your products and customers' details. It packs a user-friendly interface that encompasses intuitive functions, making it highly accessible to many
