Is this a bug in the API I am using or something else? It took me a while to see it was actually working properly. A: See: How to correctly call RemoveAttribute()? The attribute name is case-sensitive. So you must ensure that the attribute name matches with the value of the attribute name. You cannot use the name of an attribute, you must use the attribute value. Captain Underpants and the Sensational Satamancers Captain Underpants and the Sensational Satamancers is a book series by Dav Pilkey, the author also known for his earlier series Captain Underpants. It was initially published by Scholastic. The first three books were published between August 2004 and July 2005 and were also available as a movie. Synopsis The series features protagonist George Beard. Born on Halloween, he has a witch for a grandmother and is named for the last European monarch who reigned over Great Britain, George IV. His parents don't pay much attention to him and are generally absent. At school, he finds his classmates' diabolical schemes as a source of amusement. George's grandmother who is a witch, convinces George that he is destined to become the world's greatest superhero. However, as it happens, to save the world, George and his friends have to go through all of the trouble of producing a potion that makes them bigger.
