Last updated: 2013-01-28 08:38:23. BEGIN: 54.0.16299.110: 130.39.24.85:Q: javascript code that is always executed Possible Duplicate: Why does Javascript use strict mode? In chrome when debugging javascript with iframe, I can see code that is executed before my first line of code, I would like to know what it is. I'm using recent chrome, I'm not using any extension. A: This is called a "script pre-execution hook", and is an aspect of the ES5 specification. In a browser, it is triggered on scripts evaluated by the browser, so you cannot disable it. 
$$\frac{1}{\varphi(p)} + \frac{1}{p^n} \text{ right) } = \mu(p^n) + \varphi(p^n) + \frac{1}{p^n} = \mu(p^n) + \frac{p^n-1}{p-1}, \$\$$$
